## EDUCATION

---

Ph.D., Astronomy, University of Virginia *Aug 2016-May 2020*  
Thesis: *Comparing the Obscured and Un-Obscured Star Formation Properties of Luminous Infrared Galaxies to Normal Star-Forming Galaxies in the Local Universe*  
Primary Advisor: Aaron Evans  
Thesis Committee: Eric Murphy, Nitya Kallivayalil

M.S., Astronomy, University of Virginia *Aug 2014-May 2016*  
Grade Point Average of 3.947/4.0

B.S., Astronomy, Case Western Reserve University *Aug 2010-May 2014*  
Magna Cum Laude  
Minors in Mathematics and Physics  
Grade Point Average of 3.788/4.0

## RESEARCH INTERESTS

---

I am interested in high-resolution studies of star formation, the mechanisms of star formation feedback, and regulation in both normal star-forming galaxies and extreme Luminous Infrared Galaxies (LIRGs) in the local Universe. Particularly, I utilize multi-wavelength datasets of both the un-obscured (radio/submm) and obscured emission (UV/optical) from star formation in these galaxies. I am also involved with the Early Release Science Program (ERS) for the James Webb Space Telescope (JWST): A Study of the Starburst-AGN Connection in Merging LIRGs. A primary component of my analysis is to compare the properties of LIRGs to normal star-forming galaxies in the local Universe, in order to understand the nature of LIRGs and their importance to the picture of galactic evolution throughout cosmic time. I am also interested in the correlation between LIRG properties, merger stages, and AGN activity. I am conducting this work as a member of the Great Observatories All Sky LIRG Survey (GOALS), the Star Formation in Radio Survey (SFRS), and the Legacy Extragalactic UV Survey (LEGUS).

## HONORS & AWARDS

---

**Raven Society Member**, University of Virginia: *Mar 2018*  
*Inducted into the most prestigious honor's society for graduate students at the University of Virginia*

**Emma Williams Prize**, University of Virginia: *Mar 2018*  
*Awarded \$500 for outstanding achievement in research as a 4<sup>th</sup> year graduate student*

**RadioNet Research Travel Grant**, EU Horizon 2020 Research and Innovation Program: *Jul 2017*  
*A Multi-Band VLA Comparison of Normal and Extreme Star-Forming Galaxies in the Local Universe*

**Grote Reber Doctoral Fellowship**, National Radio Astronomical Observatory *Aug 2017-Aug2019*  
*Awarded \$29000 annually for the project: Star Formation Properties of Luminous Infrared Galaxies and Normal Star-Forming Galaxies in the Local Universe*

**Graduate STEM Research Fellowship**, Virginia Space Grant Consortium *May 2015-May2017*

Awarded \$12000 for the project (\$6000 per year for two years): *The Nature of Obscured and Un-Obscured Star Formation in Luminous Galaxy Mergers*

**The Formation and Destruction of Star Clusters in Luminous Infrared Galaxies** *Mar 2016*  
Huskey Research Exhibition Talk, University of Virginia, 3<sup>rd</sup> Place Award

**Jason J. Nassau Prize**, Case Western Reserve University *May 2014*  
Awarded by the Cleveland Astronomical Society to the outstanding senior student in the CWRU Department of Astronomy

**Sigma Nu Delta Alpha Alumni Chapter Award**, Case Western Reserve University *May 2014*  
Awarded for outstanding service to the active chapter by a senior

**Dean's Scholarship**, Case Western Reserve University *Aug 2010-May 2014*  
Awarded annually for \$30,000 of scholarship funding towards tuition, room, and board

## COMPUTING EXPERIENCE

---

**Operating systems:** Mac, Linux, Windows

**Programming Proficiencies:** High proficiency in SuperMongo, Python, CASA, ds9, LaTeX, Fortran, MATLAB, IRAF, SExtractor, PSFeX, GALFIT, AstroDrizzle, IDL, Microsoft Office, GALAXEV stellar evolution code, high-performance cluster environments.

**Workshops:** NRAO 15<sup>th</sup> Synthesis Imaging Workshop, June 1<sup>st</sup>-8<sup>th</sup>, 2016

## RESEARCH EXPERIENCE

---

Research Assistant, University of Virginia *Aug 2014–present*  
Advisor: Aaron Evans  
Studying un-obscured star formation at high resolution in a large sample of merging galaxies. Using HST GO15472, GO10596, and GO11196 to determine the ages and masses of optically visible star clusters in a sample of nearly 40 U/LIRGs we can determine the cluster mass function and destruction rates. These results will be compared to a matched data set in the Legacy Extragalactic UV Survey with HST (LEGUS), for which I am an active member.

Research Assistant, University of Virginia *Aug 2014–present*  
Advisor: Aaron Evans  
Studying obscured star formation at high resolution in a large sample of LIRGs using VLA 16A-204, 19A-438 to determine the star formation rate surface densities and relative contributions of thermal and non-thermal emission as a function of both region in the galaxy and distance from active regions of SF activity. A study examining the radio and near-IR properties of luminous extranuclear star-forming regions in LIRGs has recently been published.

Research Assistant, National Radio Astronomical Observatory *May 2016–present*  
Advisor: Eric Murphy  
We performed analysis on set of multi-band Jansky Very Large Array (VLA) images of 112 extragalactic nuclei and star-forming regions in 50 nearby galaxies taken as part of the Star Formation in Radio Survey (SFRS). The SFRS contains galaxies taken as part of the Spitzer/SINGS and Herschel/KINGFISH legacy programs, respectively. Our initial investigation includes a comparison of 33GHz source morphologies with H $\alpha$  imaging from SINGS. In our follow up study, I perform a full 3 – 33 GHz SED decomposition and photometric analysis for all 50 galaxies in the sample.

Summer Research Assistant, University of Virginia

May 2015–present

Advisor: Nitya Kalliyayil

I have been involved in studying the proper motions of the globular cluster Pyxis and the dwarf galaxy Segue 1 to determine their origins and fate, as well as to constrain the overall galactic gravitational potential of the MW. These efforts have been some the first ever study to use HST + ground-based Gemini AO (GSAOI) to determine a proper motion of distant halo objects. I also worked on the internal kinematics of the SMC and Magellanic Bridge with HST GO13476, to determine whether the LMC and SMC are in a binary orbit, whether they are on their first in-fall into the Milky Way, and what the rotation curve of the SMC looks like.

Undergraduate Research Assistant, Case Western Reserve University

May 2013–May 2014

Advisor: Chris Mihos

I studied the effect of interactions and mergers on spiral galaxies using high-resolution N-Body simulations. We examined the disk asymmetry and star formation rates in M101 by modeling potential merger scenarios with NGC5477 and NGC5474. I took data at Kitt Peak using the Burrell Schmidt Telescope in order to match M101's outer disk SFRs with our models

Undergraduate Research Assistant, Case Western Reserve University

Jan 2012–Jan 2013

Advisor: Earle Luck

I reduced and analyzed spectra of hundreds of cepheid variable stars observed at McDonald Observatory over the last 16 years to study the chemical composition in the milky way. I wrote several programs in Fortran to reduce, calibrate, coadd, and fit Cepheid spectra to determine key structural and chemical parameters.

## OBSERVING EXPERIENCE

---

### **Jansky Very Large Array**

Cycle A 2019

*Calibrating Star Formation Rate Diagnostics for Starburst Regions in LIRGs*

PI: **Sean Linden**, CoI: A. Evans, E. Murphy, L. Armus, K. Larson, T. Diaz-Santos, G. Privon, L. Barcos-Munoz, Y. Song

8.16 hours awarded in A configuration

### **Green Bank Observatory**

Cycle A 2019

*3mm Maps of Star Formation in Nearby Galaxies*

PI: E. Murphy, CoI: Brian Mason, **Sean Linden**, Dillon Dong, Emmanuel Momjian, Brandon Hensley, Eva Schinner, Bruce Draine, Jean Turner, Aaron Evans, Bruce Draine, George Helou

Priority B time awarded

### **Atacama Large Millimeter Array**

Cycle 6 2018

*Unveiling the Physics of the Only Known Compact Extragalactic Source of AME*

PI: Eric Murphy, CoI: **Sean Linden**, Dillon Dong, Brandon Hensley, Emmanuel Momjian, Aaron Evans, George Helou, Bruce Draine

Priority A time awarded

### **Atacama Large Millimeter Array**

Cycle 6 2018

*Molecular Gas in Twin Galactic Outflows*

PI: Kazushi Sakamoto, CoI: Susanne Aalto, Nathan Brunetti, Françoise Combes, **Sean Linden**, Aaron Evans, Nanase Harada, Youichi Ohyama, Christine Wilson

Priority B time awarded

### **Atacama Large Millimeter Array**

Cycle 6 2018

*Deriving the True Star Formation Rates in Dust-Obscured Starburst Galaxies*

PI: Hanae Inami, CoI: Lee Armus, George Privon, **Sean Linden**, Loreto Barcos-Munoz, Stacey Alberts, Justin Howell, Aaron Evans, Jason Surace, Sabrina Stierwalt, Vivian U  
Priority B time awarded

**Atacama Large Millimeter Array**

*Cycle 6 2018 - Cycle 5 2017*

*Tracking the Properties of Gas Clumps in LIRGs Along the Complete Merger Sequence*

PI: T. Diaz-Santos, CoI: Kirsten Larson, Lee Armus, Roberto Assef, Manuel Aravena, George Privon, Vassilis Charmandaris, Sabrina Stierwalt, **Sean Linden**, Philip Hopkins, Nick Scoville, Antonija Oklopčić, Aaron Evans, David Sanders  
Priority B time awarded

**Atacama Large Millimeter Array**

*Cycle 6 2018 - Cycle 5 2017*

*High Resolution Survey of the Gas and Dust Distribution in Nearby LIRGs*

PI: L. Barcos-Munoz, CoI: Sergio Martin, Adam Leroy, George Privon, Aaron Evans, Lee Armus, Ezequiel Treister, **Sean Linden**, Sabrina Stierwalt  
Priority B time awarded

**Hubble Space Telescope**

*Mid-Cycle 25 2018*

*Star Cluster Formation and Evolution in LIRGS: A Joint JWST-HST Investigation*

PI: A. Evans, CoI: **S. Linden**, L. Armus, H. Borish, V. Charmandaris, L. Chien, T. Diaz-Santos, D. Kim, J. Mazzarella, A. Medling, E. Murphy, G. Privon, J. Rich, Y. Song, S. Stierwalt, J. Surace, Vivian U  
10 orbits awarded

**Hubble Space Telescope**

*Mid-Cycle 25 2018*

*The Formation History of Milky Way Satellite Canes Venatici I*

PI: D. Weisz, CoI: M. Boylan-Kolchin, N. Kallivayalil, **S. Linden**, T. Zick, P Zivick  
8 orbits awarded

**James Webb Space Telescope**

*DDT-ERS 2020*

*A JWST Study of the Starburst-AGN Connection in Merging LIRGs*

PI: Lee Armus, CoI: Appleton, P., Barcos-Munoz, L., Charmandaris, V., Diaz-Santos, T., Evans, A., Howell, J., Inami, H., Larson, K., **Linden, S.**, Mazzarella, J., Medling, A., Murphy, E., Privon, G., Rich, J., Sanders, D., Stierwalt, S., Surace, J.  
30 hours awarded

**Green Bank Observatory**

*Cycle A 2018*

*Building integrated SEDs with the GBT for LIRGs in GOALS*

PI: **S. Linden**, CoI: Loreto Barcos-Munoz, Eric Murphy, Aaron Evans  
8 hours of Priority A time awarded

**Jansky Very Large Array**

*DDT-Cycle C 2017*

*The Origin of Anomalous 33GHz Emission from a Circumnuclear Region in NGC4725*

PI: Eric Murphy, CoI: **Sean Linden**, E. Momjian, D. Dong, Brandon Hensley  
1.25 hours awarded in C configuration

**Gemini Southern Observatory**

*Cycle A 2017*

*Probing the dark halo of the Milky Way with GSAOI*

PI: T.K. Fritz, CoI: **S. Linden**, N. Kallivayalil, S. Majewski, G. Damke, R. Beaton, J. Bovy, M. Boylan-Kolchin, R. Carrasco, R. van der Marel, T. Sohn, R. Davies, D. Angell, P. Zivick, B. Neichel  
Continuation of 143 hours awarded in Cycle A 2015

**Jansky Very Large Array**

*Cycle A 2016*

*High-Resolution Imaging of Obscured Star Formation in Luminous Infrared Galaxies*

PI: **Sean Linden**, CoI: Aaron Evans, Adam Leroy, Eric Murphy, Lee Armus, Loreto Barcos, Todd Thompson, Dong-Chan Kim, Jason Surace, Sebastian Haan, Sabrina Stierwalt, George Privon, Emmanuel Momjian, F. Walter, E. Schinnerer, K. Sakamoto  
15 hours of Priority A time awarded in A and C configurations

**Atacama Large Millimeter Array**

*Cycle 4 2016*

*ALMA's First Look at the Crab Pulsar*

PI: Allison Matthews, CoI: Scott Ransom, Christian Hayes, Matthew Pryal, Sandra Liss, **Sean Linden**, Thankful Cromartie, Scott Suriano, Loreto Barcos-Munoz, Haifeng Yang, Dustin Madison, Lauren Bittle, P. King  
5 hours of priority C time awarded

**Atacama Large Millimeter Array**

*Cycle 3 2015*

*Dense, Warm Molecular Gas and Star Formation in CO Luminous QSO Hosts*

PI: Aaron Evans, CoI: Dong-Chan Kim, George Privon, Susanne Aalto, Sakamoto Kazushi, Jason Surace, Peter Barthel, **Sean Linden**, Mark Lacy, Loreto Barcos  
2 hours of priority A time awarded

**Atacama Large Millimeter Array**

*Cycle 3 2015*

*Do PG QSOs in the Local Universe Reside in Molecular Gas-Rich Hosts?*

PI: Aaron Evans, CoI: Jason Surace, Susanne Aalto, George Privon, Mark Lacy, Dean Hines, Peter Barthel, **Sean Linden**, J. Braatz, D.-C. Kim, P. Martin, L. Barcos-Munoz  
3 hours of priority B time awarded

**Hubble Space Telescope**

*Cycle 23 2015*

*Proper Motion and Internal Kinematics of the Small Magellanic Clouds: Are the Magellanic Clouds bound to one another?*

PI: Nitya Kallivayalil, CoI: **Sean Linden**, Charles R. Alcock, Jay Anderson, Gurtina Besla, Marla C. Geha, Chris S. Kochanek, Szymon Kozłowski, Roeland P. van der Marel  
60 orbits awarded (30 in Cycle 23 and 30 in Cycle 21)

*Additional programs for which I have made significant contribution:*

**Hubble Space Telescope**

*Cycle 24 2016*

*Hearts of Darkness: Compact Obscured Nuclei in S0/a Galaxies*

PI: J. Gallagher, CoI: **A. Evans**, S. Alto, S. Koenig, S. Muller, Y. Ohyama, K. Sakamoto  
7 orbits awarded

**Jansky Very Large Array**

*Cycle A 2014*

*High-Resolution Imaging of Obscured Star Formation in Luminous Infrared Galaxies*

PI: **Aaron Evans**, CoI: Adam Leroy, Eric Murphy, Lee Armus, Loreto Barcos, Todd Thompson, Dong-Chan Kim, Jason Surace, Sebastian Haan, Sabrina Stierwalt, George Privon, Emmanuel Momjian, Fabian Walter, E. Schinnerer  
100 hours of Priority A time awarded in A and C configurations

**Jansky Very Large Array**

*Cycle A 2013 – Cycle B 2013*

*The Star Formation in Radio Survey*

PI: **Eric Murphy**, CoI: D. Dong, E. Momjian, R. C. Kennicutt, D. S. Meier, E. Schinnerer, J. L. Turner

## TEACHING & MENTORING EXPERIENCE

---

Instructor of Record, University of Virginia

*Jul 2015–Aug 2015*

Instructor of record for ASTR 1220: *Stars, Galaxies, and the Universe in the Summer 2015 term at the University of Virginia*. I designed and implemented an original syllabus,

set of homework assignments, quizzes, lectures, and projects for a 4 week 5 day a week course. I was the sole instructor for the course and received very high evaluations.

Teaching Assistant, University of Virginia

*Aug 2014–May 2017*

I have proctored and graded tests for ten sections of the introductory astronomy courses that each included over 100 students. I have been in charge of running a night lab exploring constellations and the night sky four nights a week for the introductory astronomy courses since the spring of 2015.

National Radio Astronomy Consortium Mentor, NRAO

*May 2018–Aug 2018*

I was a mentor for NAC summer student Cecilia Molina, who worked in my research group under Aaron Evans at the NRAO. I helped Cecilia from start to finish through a project comparing the 33GHz thermal emission to Chandra X-ray data in luminous infrared galaxies in GOALS. This was done using a subset of the data I collected through VLA6A-204.

National Radio Astronomy Consortium Mentor, NRAO

*May 2017–Aug 2017*

I was a mentor for NAC summer student Maryam Hami, who worked in my research group under Aaron Evans at the NRAO. I helped Maryam from start to finish through a project comparing the 33GHz thermal emission to hydrogen recombination line data in the luminous infrared galaxies NGC 5257/8, NGC 5331, and IC 0214. This was done using a subset of the data I collected through VLA6A-204.

National Radio Astronomy Consortium Mentor, NRAO

*May 2016–Aug 2016*

I was a mentor for NAC summer student Antonio Porras, who worked in my research group under Aaron Evans at the NRAO. I helped Antonio from start to finish through a project comparing the 33GHz thermal emission to the dense gas emission in the luminous infrared galaxy NGC 6240. This was done using a subset of the data I collected through VLA6A-204.

## OUTREACH EXPERIENCE

---

Dark Skies Bright Kids Volunteer, University of Virginia

*Aug 2014–present*

We plan and run a 10-week after school science program with underserved schools in Albemarle County Virginia. We have also been given a grant from the Hewlett-Packard Foundation to run 1-week long summer programs designed to interact with kids from counties southern Virginia, for the next three years. For the last 4 years I have been producing and managing all social media content and activity for DSBK across both Twitter and Facebook. I am also the PI of an IRB-SBS approved study utilizing the Draw A Scientist Test (DAST): “Evaluating the Impact of Dark Skies, Bright Kids Astronomy Clubs on Elementary School Students,” which runs from April 2016-April 2020.

Leander McCormick Public Night Volunteer, University of Virginia

*Aug 2014–present*

I have run the McCormick Doghouse telescopes, and given multiple public talks during the Fall and Spring Public Night monthly series where we often serve up to one hundred people per night.

Fan Mountain Public Night Volunteer, University of Virginia

*Aug 2014–present*

I have run the Fan Mountain 40” control room presentation, and have given multiple public talks during the fall and spring Public Night annual series where we serve several hundred people over the course of the night.

## ADDITIONAL LEADERSHIP EXPERIENCE

---

Raven Council Fellowship Chair, University of Virginia

*May 2018–present*

I am responsible for organizing and awarding the Raven societies' annual fellowship which is awarded to students throughout the university for excellence in research and is designed to aid them in completing their current thesis projects and attend meetings to present results.

Graduate Student Representative, University of Virginia

*Jan 2017–present*

I am responsible for managing all other graduate student roles within the department, organizing and running regular meetings at the end of each semester to review classes, TA assignments, etc., and finally, for providing all grad students with reminders about important deadlines and administrative tasks.

Astronomy Department Picnic Coordinator, University of Virginia

*Jan 2016–Jan 2017*

I was responsible for organizing and running a picnic for the Astronomy Department once a semester. These events included catered food, and were opportunities for faculty, staff, and their families to interact with graduate students in a social setting.

Sigma Nu Fraternity Treasurer, Case Western Reserve University

*Jan 2010–May 2014*

I was the treasurer and member of the Executive Council. I reformed the payment system in Sigma Nu by instituting Square Payments and converting reimbursements to an online automated system. For which I received the alumni award.

Student Leadership Journey Council President, Case Western Reserve University

*Jan 2011–May 2014*

I was the president and a member of the Executive Council. While president we received honorable mention for an outstanding on-campus event: The Presidents Dinner. This was a networking event for all of the campus presidents to facilitate multi-group collaborative event planning on campus. During my tenure, I was also an honorable mention for outstanding president of a student organization.

## POSTERS & PRESENTATIONS

---

**A Multi-Wavelength Study of Massive Star-forming Regions in Luminous Infrared Galaxies in GOALS**, S. Linden, The Laws of Star Formation: From the Cosmic Dawn to the Present Universe, 20 min talk, Jul 2<sup>nd</sup>-6<sup>th</sup>, 2018

**A Comparative Study of Star-Forming Regions in Luminous Galaxy Mergers and Normal Star-Forming Galaxies in the Local Universe**, S. Linden, Astrophysical Frontiers in the Next Decade and Beyond, Poster, Jun 26<sup>th</sup>-29<sup>th</sup>, 2018

**Galaxy Mergers and the Fate of the Milky Way**, S. Linden, Fan Mountain Public Night, University of Virginia, 30-minute talk, Apr 13<sup>th</sup>, 2018

**A VLA Study of Massive Star-Forming Regions in Luminous Infrared Galaxies**, S. Linden, Bob Rood Memorial Symposium, University of Virginia, 10-minute talk, Mar 2<sup>nd</sup>, 2018

**Galaxy Mergers and the Fate of the Milky Way**, S. Linden, Fan Mountain Public Night, University of Virginia, 30-minute talk, Oct 13<sup>th</sup>, 2017

**A Multi-Band VLA Comparison of Normal and Extreme Star-Forming Galaxies in the Local Universe**, S. Linden, Measuring Star Formation in the Radio, Millimeter, and Submillimeter, University of Manchester, UK, 15-minute talk, Jul 25<sup>th</sup>, 2017

**Examining the Evolution of Star Clusters and Star-Forming Regions Within LEGUS/SFRS Galaxies**, S. Linden, Linking Observations and Theory Across the Scales of SF in Galaxies, Sexten Center for Astrophysics, 15-minute talk, Jul 11<sup>th</sup>, 2017

**The Nature of Obscured and Un-Obscured Star-Formation in Luminous Galaxy Mergers**, S. Linden, Virginia Space Grant Consortium, College of William and Mary, 10-minute talk, Apr 19<sup>th</sup>, 2017

**Understanding Star Formation in the Radio: Normal Galaxies vs. Luminous Infrared Galaxies in the Local Universe**, S. Linden, Bob Rood Memorial Symposium, University of Virginia, 10-minute talk, Mar 31<sup>st</sup>, 2017

**The Star Formation in Radio Survey**, Sean Linden, 83<sup>rd</sup> Annual Meeting of the APS Southeastern Section, 15-minute talk, Nov 10-12<sup>th</sup>, 2016

**The Star Formation in Radio Survey (SFRS): Multi-band VLA imaging for 50 Nearby Star-Forming Galaxies in SINGS/KINGFISH**, Sean Linden, Eric J. Murphy, Emmanuel Momjian, Dillon Dong, Robert C. Kennicutt, 32<sup>nd</sup> New Mexico Symposium, Socorro NM, Poster, Nov 4<sup>th</sup>, 2016

**The Star Formation in Radio Survey (SFRS): Multi-band VLA imaging for 50 Nearby Star-Forming Galaxies in SINGS/KINGFISH**, Sean Linden, Eric J. Murphy, Emmanuel Momjian, Dillon Dong, Robert C. Kennicutt, Half Decade of ALMA: Cosmic Dawns Transformed, Palm Springs CA, Poster, Sep 20-23<sup>rd</sup>, 2016

**Massive Star Cluster Formation and Destruction in Luminous Infrared Galaxies**, S. Linden, 4<sup>th</sup> Annual DC/MD/VA Summer Astrophysics Meeting, George Washington Department of Physics and Astronomy, 10-minute talk, Jul 15<sup>th</sup>, 2016

**The Formation and Destruction of Star Clusters in Luminous Infrared Galaxies**, S. Linden, Virginia Space Grant Consortium, NASA Langley Research Center, 10-minute talk, Apr 11<sup>th</sup>, 2016

**The Formation and Destruction of Star Clusters in Luminous Infrared Galaxies**, S. Linden, Huskey Graduate Research Exhibition, University of Virginia, 10-minute talk, Mar 23<sup>rd</sup>, 2016

**The Cluster Destruction and Mass Functions of Luminous Infrared Galaxies**, S. Linden, A. Evans, and the GOALS Collaboration, American Astronomical Society Meeting 227, Poster 240.15, Jan 4-8<sup>th</sup>, 2016

**Determining the Ages of Star Clusters in Interacting Galaxies**, S. Linden, Bob Rood Memorial Symposium, University of Virginia, 10-minute talk, Oct 16<sup>th</sup>, 2015

**Determining the Ages of Star Clusters in Colliding Galaxies**, S. Linden, McCormick Public Night Lecture Series, University of Virginia, 30-minute talk, Aug 7<sup>th</sup>, 2015

*Contributed Posters:*

**Assessing the Feasibility of X-ray Emission in Determining the Star Formation Rates of LIRGs**, Molina, Cecilia N.; Evans, Aaron; **Linden, Sean**, American Astronomical Society Meeting 233, 368.04

**Calibration of a Mid-Infrared Star-Formation Rate Tracer with 33 GHz Thermal Radio Continuum Emission**, Whitcomb, Cory; Sandstrom, Karin; Murphy, Eric J.; **Linden, Sean**, American Astronomical Society Meeting 233, 366.08

**Dark Skies, Bright Kids! - Year 10**, DSBK Collaboration, American Astronomical Society Meeting 233, 147.09

**Radio Continuum Emission from Galaxies: An Accounting of Energetic Processes**, Eric Murphy, ASP Conference Series, Vol. 517

**Dark Skies, Bright Kids Year 9**, DSBK Collaboration, American Astronomical Society Meeting 231, 360.01

**High Resolution 33 GHz Observations of Embedded Star Formation in NGC 6240**, Porras, Antonio J., Evans, Aaron S., **Linden Sean**, Barcos-Munoz, Loreto, American Astronomical Society Meeting 229, 153.09

**Dark Skies, Bright Kids Year 8**, DSBK Collaboration, American Astronomical Society Meeting 229, 335.09

**Dark Skies, Bright Kids Year 7**, DSBK Collaboration, American Astronomical Society Meeting 227, 248.07

*Attended Conferences:*

Molecular Gas in Galactic Environments, NRAO, Charlottesville VA, Apr 4-7<sup>th</sup>, 2016
